Strong pipes volume drove 4Q performance

Supreme Industries (SI)'s 4QFY22 revenue and PAT beat was driven by strong pipes volume (up 27% YoY and 69% QoQ) while other segments had subdued performance. High RM prices and inadequate price hikes continued to weigh on gross margin (27.9%, down 412bps QoQ) and EBITDA margin (15.3%, down 103bps QoQ). We expect margin pressure to remain for next few quarters. Recent fall in PVC prices has improved trade sentiment and should drive re-stocking. The company aims to aggressively expand in pipes with focus on market-share gains. Higher inventory of packaging products ahead of season impacted cash levels. This will normalise and will support the capex plan. SI's long-term prospects are intact but at ~24x FY24E P/E (27x, the five-year mean) and a low 3% earnings CAGR over FY22-24 on margin normalisation, we maintain our HOLD rating on the stock with a revised target of Rs 2,142 (28x FY24E core P/E, 20x to JV share) vs Rs 2,419 earlier.

Strong volumes drove revenue and PAT beat; margin pressure continued though: SI's 4Q revenue (up 23% YoY and 31% QoQ) was driven by strong recovery in pipes volume (up 69% QoQ); performance of other segments was subdued though. Elevated prices of key raw materials continued to weigh on gross margin (27.9%, down 412bps QoQ) and EBITDA margin (15.3%, down 103bps QoQ) due to inadequate price hikes. Blended EBIT/kg (Rs 26; down 37% YoY and 9% QoQ) was suppressed due to weak margins in pipes and consumer products; packaging and industrial products reported QoQ recovery on low bases. The share of value-added products improved to 38.6% from ~35% in the previous quarter. Strong JV profits (Rs 696mn, 21% of PAT) continued to boost SI's consolidated PAT.

Volumes up 16% YoY/41% QoQ led by strong recovery in pipes: Strong 4Q volumes can be attributed to its pipes (up 27% YoY, 69% QoQ) division. CPVC pipes grew better than others. Packaging (down 16% YoY and 21% QoQ) saw a significant downfall while the industrial segment continued to recover (up 11% QoQ). Consumer products remained in slow lane as volumes declined 11% YoY and was flat QoQ. Softening PVC prices since end-Mar'22 has improved trade sentiment and will drive demand offtake. Sombre demand in agri pipes is expected to strongly recover in FY23. Material handling, performance and protective packaging division has shown good growth led by deepened market reach. Cross laminated film business impacted due to low tarpaulin demand and fierce competition. Company aims to focus on improving its non-tarpaulin product's share.

Volumes to rebound as PVC prices cool off: After correcting ~6-7% over Q4FY22, PVC prices are expected to further soften and drive channel restocking. Thus, after a 4% YoY volume drop in FY22, the company expects over 15% growth in FY23.

Capex on track: SI has invested Rs 4.7bn in FY22 on capacity expansion in all segments and targets a capex of ~Rs 5bn for FY23. Projects in its Guwahati, Cuttack and Erode plants will be operational during Aug-Sep'22. Post all expansion, 800,000 tons capacity will be available by Mar'23. Pipes capacity will increase to ~600,000 tons while composite cylinder's capacity to be doubled to 1mn cylinders.

Valuation and View: We remain sanguine about SI's growth prospects due to structural demand drivers, network/region expansion and product launches. A healthy balance sheet will support continued capex to achieve growth in the long run. However, on flattish earnings CAGR over FY22-24, we retain our HOLD rating on the stock with a revised target of Rs 2,142. Risks: Volatile raw material prices pose risks on demand destruction and margin compression.

Valuation and View

Supreme Industries is the largest plastic processor in India, selling ~0.4mn tonnes of plastic products across five segments. Its strengths are its brand equity, leadership position in key segments, regular capacity additions and focus on value-added products. It has 25 plants across India with three envisaged in the next year.

Over FY17-22, SI's revenue/EBITDA/PAT grew at a CAGR of 12%/10%/18% with RoE averaging at 24%; on a high base, we expect a CAGR of 7%/6%/3% over FY22-24E, driven by volume growth in all segments but lower realisations on expectation of fall in commodity prices. Inadequate price hikes will weigh on margins but healthy free cash flow should continue.

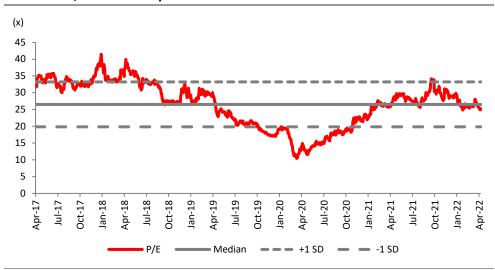

At ~24x FY24E P/E (vs. 27x five-year mean), we maintain our **HOLD** rating on the stock with a revised target price of Rs 2,142 (28x FY24E core P/E, 20x to JV share) vs. Rs 2,419 earlier. Polymer price movement and earnings growth/FCF are key monitorables.

Risks

- High and volatile raw material prices may suppress demand and margins.
- Lower-than-expected growth in its business divisions would pose a downside to our estimates.
